Mike Coughlin, who has unseated strata after strata of granite on Millstone hill in days gone by, is in charge of blasting operations which were gotten under way on the Merchant street extension this morning, when a gang of laborers supervised by Supt. J. S. Wilson of the street department began the work of blasting through 70 feet of ledge for the new sewer and water line that is calculated to put an end to the petitions which people in that vicinity have been pouring into the city council year after year. Merchant street folks are going to have some of the utilities that are provided for other residents of the city whose tax bills are no larger than theirs. But to bring about this consummation, the city council will have to finance a considerable blasting project. A tunnel put a private spring water line through the same section a few years ago without blasting, but the grade which follows the water line was too precipitous for a sewer extension and the blasting is necessary. The extension will be completed in a few weeks.
